

Mission

The Bamboo Token project is an initiative linked to the Green Economy and all interventions aimed at contrasting the consequences caused by pollution and the advancement of climate change. The initiative was also created to encourage the development of agricultural enterprises in the territories involved in the project by creating plantations that will then be donated to them. To pursue this aim, it was decided to operate in the cultivation of bamboo plantations which, by their very nature, allow a considerable supply of oxygen to the environment. Bamboo is also particularly versatile and adaptable to various temperatures and terrain types. For all these reasons it will be essential to raise awareness among all participants in supporting the project Bamboo Token because, through the construction of the plantations, will make it possible to cultivate large amounts of land often abandoned or partially used.

By participating in the BambooToken project, it will be possible to carry out an initiative characterized by a direct impact on the environment thanks to the ability of plants to purify the surrounding air, to increase the productivity of the territory and to encourage the creation of eco-sustainable and biodegradable products for different sectors of the textile, food, construction and other industries.

The Bamboo

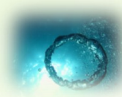

Production of culms and shoots from the **3rd year** of age

More than **1500** products available

75 to 120 years of productivity

35% more oxygen produced than in the common forest

Strength up to **-20°C**

62 tons of CO2 converted into oxygen per hectare per year

Token features

Token simbol	BMTK
n. Token issued	10 milioni
n. Token on sale	7 milioni
Purchasing methods	Piattaforma WEB
Accepted currencies	BTC, ETH, LTC, TRX, EUR, USD
Token value	1 BMTK= € 1,50
Token in Pre-Sale	350.000
Token In Public Sale I	350.000
Token in Public Sale II	6.300.000

BambooToken Team

Alfio Moretti
CEO & Founder

Matteo Calzuola
Executive Assistant.

Sebastiano Gambera
CFO & Business Advisor

Daniele Mantovani
WEB Manager

Enrico Cadeddu
Marketing Manager

Fabio Pacchioni
Blockchain Developer

How it works

Participants → BMTK Token → Crps Moso: sprouts and culms

Green Economy: CO2 conversion and greater oxygenation of the air

Environmental sustainability: production of eco-sustainable and totally biodegradable materials and products (construction, textile, food...)

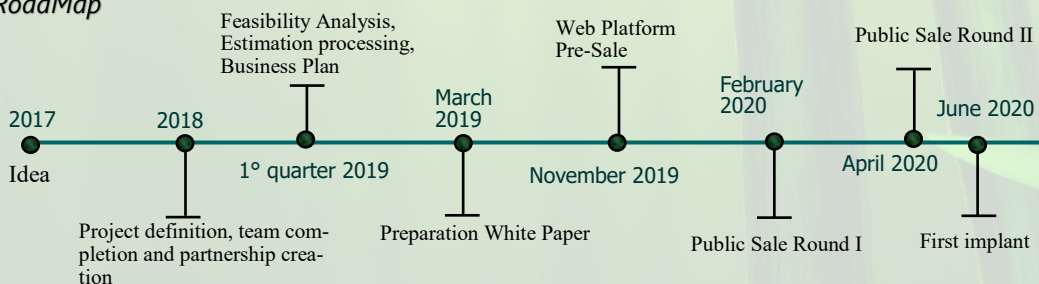

Starting from the third year of activity, the participants will receive the harvest of the amount of Bambuseto adopted

Year	Sprouts Production (kg)	Average value	Culms Production <12 cm (T)	Average value	Culms Production >12 cm (€/centra)	Average value
1	-	-	-	-	-	-
2	-	-	-	-	-	-
3	1.750.000	4.500.000	3.125.000	500	500	500
4	2.800.000	7.400.000	5.100.000	1.000	1.000	1.000
5	3.750.000	10.000.000	6.875.000	3.750	5.625	4.688
6	3.750.000	10.000.000	6.875.000	5.625	11.250	8.438

Token Sale

Round	% on sale	Bonus	Token price	Number
Pre Sale	5%	40%	€ 0,90	350.000
Public Sale I	5%	20%	€ 1,20	350.000
Public Sale II	90%	0%	€ 1,50	6.300.000

RoadMap

Partners

- ◇ **New Farming srl:** an Italian agricultural company which will manage the project in Italy and acquire the land at the end of the 15 year period
- ◇ **CBI SpA:** Commercialisation of bamboo shoots and culms
- ◇ **Vivai OnlyMoso:** Supply of plants and support in the cultivation of bamboo plants
- ◇ **Papini Francesco Impresa Agricola:** Realization of the bamboo plantations, management and maintenance, sprout collection
